Culture

Bhojpuria.com

Country: India
Website: <http://www.bhojpuria.com>

Description:
The World's first Portal for Bhojpuri Speaking people. The site attempts successfully to provide a holistic and a global platform for more than 340 million Bhojpuri speaking people across the Globe. The site provide continuous information and coverage on life in the Bhojpuri community.

CINeSPACE

Country: Spain
Website: <http://www.cinespace.eu>

Description:
CINeSPACE Project enables users to interact with location-based multimedia while touring a city. Audiovisual content is delivered via a Head Mounted Display with a high definition screen allowing users to record what they are seeing and to upload onto the system through a WLAN hotspot or 3G connection. CINeSPACE aims to provide collaborative experiences for users, enabling them to share personal experiences while on the move.

ColArte

Country: Colombia
Website: <http://www.colarte.com>

Description:
ColArte is a web site dedicated to compile and show Colombian art and beauty from the prehispanic world to current plastic arts, scenic arts, music, photography. ColArte presents more than 8,500 Colombian artists, museums, art galleries, cities, places of interest, flora and fauna.

Compendium of Cultural Policies and Trends in Europe

Country: Germany
Website: <http://www.culturalpolicies.net>

Description:
This unique on-line information and monitoring system provides easy access to data, facts, trends and summaries of current debates on national cultural policy developments and trends in Europe. The system is updated annually by a unique community of practice of independent cultural policy researchers, NGOs and national government representatives. It has become a working tool for authorities, institutions and individuals involved in cultural policy making and research in Europe and world-wide

Comunidad Segura

Country: Brazil
Website: <http://www.comunidadsegura.org>

Description:
An interactive tool to encourage the discussion of human security issues and networking among civil society organizations, researchers, policy makers, journalists and the general public, locally and internationally. Comunidad Segura combines news, virtual communities, and the Virtual Library on Public Security and Human Rights with over one thousand publications. News coverage includes human safety with an emphasis on youth and armed violence, security sector reform, gun control and culture of peace in four languages.

Cookery-book à la Blåkulla

Country: Sweden
Website: <http://www.studieframjandet.se/nas>

Description:
A cookery-book on the web created by the inhabitants of Hagalund (Blåkulla), favouring democracy, fighting isolation and developing knowledge of language and IT.

DigitalCopyright.hk

Country: Hong Kong
Website: <http://www.DigitalCopyright.hk>

Description:
This one-stop, trusted e-biz marketplace is a centralized clearance solution to bridge both digital content owners and consumers. It enables owners to sell their content and flexibly set business rules for the content. In this way, contents are distributed in a controllable manner and thus unlawful replication and distribution of contents can be deterred. An extended platform is already built for over 1,200 schools to download DRM protected Education TV programmes for classroom learning.

freeDimensional - Creative Safe Haven

Country: United States
Website: <http://www.freedimensional.net>

Description:
freeDimensional is implementing a web-based community platform with public and private space for each network member to provide program information and events to the public and present a showcase of on-line artworks for sale as well as an anonymous function that allows safe and secure nominations from human rights organizations to member centres. The Online sales support an Artist Mobility Fund for the artist-in-residence.

CulturaGeneral.net

Country: Spain
Website: <http://www.CulturaGeneral.net>

Description:
Facts and Data exposed in a user-friendly format to provide free access to culture in just one click.

Digital Green: Participatory Video for Agricultural Extension

Country: India
Website: <http://www.digitalgreen.org>

Description:
This research project seeks to disseminate locally, relevant agricultural information to small and marginal farmers in India through community-produced digital video in a framework for participatory learning.

GridRepublic

Country: United States
Website: <http://www.gridrepublic.org>

Description:
GridRepublic is a non-profit organization created to provide supercomputing resources to public interest research, by use of volunteer distributed computing.

I Love SG

Country: Singapore
Website:
http://www.earthsg.com/index.php?option=com_content&act=mups&task=list&cid=43

Description:
In conjunction with National Day celebrations MICA invited primary school students across Singapore to produce websites and videos on the things they love about Singapore. A separate competition was also run for members of public using the same theme. The project deploys a Web 2.0 ICT platform which allows users to tag their memories and pictures onto a digital map of Singapore and can be viewed on Google Earth.

Letralia, Tierra de Letras

Country: Venezuela
Website: <http://www.letralia.com>

Description:
Spanish American writers' magazine on the Internet

LibriVox.org

Country: Canada
Website: <http://librivox.org>

Description:
LibriVox is an open, international volunteer project with the objective of making all public domain books available as free audio books. The catalogue has 749 works, in 17 languages, and 60 audiobooks per month are added to the catalogue.

Rediscover Singapore

Country: Singapore
Website:
<http://www.ur.gov.sg/publications/walkingmaps/index.html>

Description:
In their rush to embrace the future, Singaporeans sometimes overlook the fact that there are many cultural and natural heritage places in their own backyard both in the city centre and suburbs. Rediscover Singapore is a unique explorer's guide to various interesting nooks and crannies around Singapore.

The Big Myth

Country: Belgium
Website: <http://www.bigmyth.com>

Description:
The Big Myth is a Flash-based learning website for the study of world creation mythology for students aged 12-14

Network of European Alimentary Culture

Country: Italy
Website: <http://www.neac.eat-online.net>

Description:
Table manners, likes and dislikes reflect a vivid image of society. Food as an anthropological paradigm of society, can be analysed from the viewpoints of art, literature, science, music, and sociology. Sharing ideas about good food from a local, regional and international perspective, makes this a very imaginative and attractive initiative for children, parents and teachers. It allows participating groups to open their minds and explore the cultural aspects of all European countries involved.

Network of Public Libraries Medellin

Country: Colombia
Website: <http://www.reddebibliotecas.org.co>

Description:
36 interconnected libraries have created a collaborative knowledge network, open to the world and using ICT as a learning resource to enhance library management, human capacity and services, and to reduce costs. The network has an integrated web site with unified online catalogue, forums, chat, kids corner and other interactive tools. The project supports the 3 main pillars of ICT: access and connectivity, content and services, and training and empowerment.

UnnayanTV

Country: Bangladesh
Website: <http://www.unnayanTV.com>

Description:
UnnayanTV is the Bangladesh online video channel to publish regularly video content on development, human rights and educational issues of Bangladesh

Veratur Voice Portal Phone Service

Country: Mexico
Website: <http://www.veratur.gob.mx>

Description:
The Voice Portal is intended to deliver cultural and tourist information at a low cost using the wide phone network built in Mexico. VERATUR's main goal is to simulate a well trained and informed human operator. People can call toll free number to talk with a virtual operator and request any tourist and cultural information from the state of Veracruz. The virtual operator should answer 98% of the callers questions in less than 3 minutes of conversation.

Virtual Information Technology Institute for Kids

Country: Egypt
Website: <http://www.viti4kids.gov.eg>

Description:
VITI4kids is a multimedia edutainment website for Arab kids between 4 and 9 years old, that aims at building up their computer and IT knowledge.

Viva Favela

Country: Brazil
Website: <http://www.vivafavela.com.br>

Description:
Viva Favela is Viva Rio's largest IT Program , focused on the social and digital inclusion of children, teenagers and youth in poor neighborhoods, who are particularly exposed to risks in a conflictive environment.

Young Diplomats - Multimedia Diary

Country: Poland
Website:
<http://webnews.textalk.com/en/view.php?id=9170>

Description:
The project tries to establish the link between different kinds of celebrations in Asia and Europe, helping to know and understand better cultural manners and bring students from Asia and Europe closer to each other through the process of self presentation and studying different traditions. It will help the students to understand better their own traditions and historical/cultural roots as well.

Economic Development

Agricultural Development East Africa Agrovat

Country: Kenya
Website: <http://www.wadeaagrovet.org>

Description:
ADEA Agrovat is a social enterprise focusing on promotion of organic farming through provision of agricultural inputs products and services to farmers in Kenya to ensure that everyone in the network gains economically from organic farming.

Akashganga

Country: India
Website: <http://akashganga.in>

Description:
Using simple but appropriate technology to facilitate timely collection of milk and thereby generating higher earnings for milk producers.

All Blind Orchestra

Country: India
Website:
<http://www.visuallychallenged.com/orchestra/>

Description:
HEART 2 HEART, the Orchestra by the Visually Challenged was formed to enable talented musicians to make the most of their ability.

CAM Mobile Based Rural Information Services in Microfinance

Country: India
Website: <http://www.ekgaon.com/CAM>

Description:
This three-tier document-based architecture provides remote rural information services for SHGs in Microfinance. Paper forms record information, perform queries and conduct secure transactions while the mobile phone acts as a scanner, user interface, network, cache & pre-processor in the system. The system increases the efficiency of finance management, increases security and reduces the credit journey cycle.

Campaign Against Cyber Crime Project

Country: Nigeria
Website: <http://justicegroup.org/cybercrime.htm>

Description:
Campaign Against Cybercrime (CAC) is a project that utilizes ICT as a tool for securing the fundamental rights of online business owners as well as the rights of consumers from internet criminals.

Cleopatra Store E-Marketing for Women Entrepreneurs

Country: Egypt
Website: <http://www.cleostore.com>

Description:
To help women entrepreneurs market and sell their products through the web

e-Forum Officer Project

Country: United Kingdom
Website: <http://www.coalfieldforum.org>

Description:
Innovative use of effective low cost ICT methods combined with cutting edge new technologies with the aim of improving social inclusion, education, employment and take up of local services in a former coal mining region of the City of Sunderland.

E-learning@nanasala

Country: Sri Lanka
Website: <http://www.nanasala.lk>

Description:
The growth of distance education is being fuelled by the urgent need to close the education gap between poor and rich nations developing and strengthening education, building capacity and capability and promoting local entrepreneurship through E-learning to allow them access to the job market and other business ventures and make their lives better.

COMESA SMEToolkit Project

Country: Zambia
Website: <http://zamcom.smetoolkit.org>

Description:
The Zambia - COMESA SMEToolkit is a computer web-based business / SMEs information portal with training resources, business forms and tools covering eight core business management areas: accounting & finance, HR, IT, International business, operations & management, legal & insurance, sales & marketing & business planning.

Country: Philippines
Website: <http://www.b2bpricenow.com>

Description:
This integrated e-commerce m-commerce program has an agriculture e-marketplace that provides up to the minute price updates and other market information and money movements through the integrated solution.

Electronics Technicians Association eSagu

Country: Uganda
Website: <http://www.electronicstechnicians.org>

Description:
The Association is building a community of competent electronics technicians and ICT specialists who are crucial factors in sustaining and optimizing ICT4D if Uganda's millennium development goals are to be met. The association represents and empowers electronics Technicians to be professionals, protects consumers and consulting policy makers to maximize the benefits of ICT and Electronics Technologies in all sectors of life.

Country: India
Website: <http://www.esagu.in>

Description:
eSAGU is a personalised Agro Advisory System providing "Seed to Harvesting" personalized Agro Advisories from Experts to small and marginal farmers who provide crop data photographs and text through co-ordinators. This helps farmers use scientific farming practices and achieve significant efficiency and output gains without disturbing their regular farm activities.

Establishment of an ICT4D Research & Resource Centre in Toro

Country: Uganda
Website: <http://www.torodev.kabissa.org>

Description:
The Research and Resource Centre was initiated in 2005 and implemented by Toro Development Network, a local community based NGO in Toro Region of Western Uganda. The Community Information Needs Assessment Survey (2005-2006) launched the project startup and provided guidelines for the rest of the project activities.

Etsha Weavers Group

Country: Botswana
Website: <http://www.botswanacraft.bw/gallery>

Description:
The Etsha basket weavers felt the prices received locally did not adequately reward their efforts so they formed a group to market their artworks directly on the internet. They now sell most of their work to collectors globally and have a dream to open a world university of basket making in Etsha.

ICT/High Tech Educational Consortium

Country: Armenia
Website: <http://www.uite.org>

Description:
The Consortium fosters innovative collaboration between educational institutions and businesses in Armenia to establish qualification requirements for ICT specialists during the formulation of educational curricula and the organization of professional students' practices. The best students will get financial support to start their own companies.

Info Timor

Country: East Timor
Website: <http://www.technology.tl>

Description:
To assist in the rebuilding of East Timor by using information communication technology to deliver skills development, education and employment through the creation of a sustainable not-for-profit social enterprise.

EuroCv

Country: Italy
Website: <http://www.eurocv.eu>

Description:
EuroCV is a unique interactive online resource that empowers the job seeker to control the exposure of their professional profile in the European job market.

Fantsuam Foundation Community Wireless - ZittNet

Country: Nigeria
Website: <http://www.fantsuam.org>

Description:
ZittNet is a wireless internet provider serving clients in the Kafanchan area of northern Nigeria, specifically targeted towards other non-profit and community development related organizations. It provides affordable internet and rural telephony access to a rural population of 150,000 to enhance youth employability through ICT skills training, downstream self employment opportunities and make it possible for rural clinics to have access to Telemedicine facilities and e-learning opportunities using a social Entrepreneurship model that uses microfinance to support the rural network service

Learning Experience

Country: India
Website: [http://www.indiahabitat.org/Habitat Learning Centre](http://www.indiahabitat.org/HabitatLearningCentre)

Description:
A multi-purpose learning centre aiming to provide underprivileged children access to information technology to explore more and better options for their life

Linking Farmers to Markets Through ICTs in Kenya

Country: Kenya
Website: <http://www.kacekenya.com>

Description:
Since 1997, Kenya Agricultural Commodity Exchange has been developing and testing a market information and market linkage system to make agricultural markets work more efficiently for farmers, especially smallholders. MILS enhances the bargaining power of the farmer for a better price in the market place.

M-PESA Money Transfer Service

Country: Kenya
Website: <http://www.safaricom.co.ke>

Description:
M-PESA offers customers a fast safe and affordable way to transfer money by SMS anywhere in Kenya. Registration for M-PESA is free and users do not need a bank account.

Mobile For Good

Country: Kenya
Website: <http://www.mobile4good.com>

Description:
Mobile4Good offers innovative solutions that generate high traffic and revenue from SMS, mobile gaming and business tools on the mobile platform. The platform distributes content relevant to individual customers based on handset, location, time and business profile while identifying new opportunities through data analysis.

SDA Payment Gateway

Country: Egypt
Website: <http://www.sda-web.org>

Description:
The Gateway enables any individual or business with bank account, credit card or mobile subscriptions to securely, easily and quickly send and receive payments online.

Social Actions

Country: Canada
Website: <http://www.socialactions.com>

Description:
Social Actions helps individuals, nonprofits, and foundations make excellent use of social media so that peer-to-peer solutions to local and global problems can flourish.

Naijahotjobs.com

Country: Nigeria
Website: <http://www.naijahotjobs.com>

Description:
The project is an online career community that brings all the unemployed graduates in Nigeria together, to discuss issues ranging from small business startup, entrepreneurship, financial issues and mutual support on assessment and interviews. Members notify each other of new job openings, reducing fraud & internet crime related cases among the unemployed.

OregonProspector.com

Country: United States
Website: <http://www.OregonProspector.com>

Description:
OregonProspector.com facilitates business and job growth in economically depressed areas with a focus on redevelopment, small and medium size enterprises and democratizing information by providing high-quality property, demographic and business information through the Internet.

Social Security Pensions Software

Country: India
Website: <http://www.sspap.gov.in>

Description:
The ICT solution for social security pension is designed to optimize service delivery and governance for the benefit of the most vulnerable sections in society by ensuring that all the enabling processes for distribution of pensions are carried out in a transparent manner and that the 4.7 million beneficiaries get pensions on 1st of every month at a notified place in their village

Strengthen Fair Trade Within Social Entrepreneurship

Country: Bangladesh
Website: <http://www.ecotafft.org>

Description:
The Project aims to scale up fair trade organizations by enhancing organizational capacities in using advanced information technologies, improving Enterprise management and linking them with global fair trade periphery. The Project provides Supply-chain management, Inventory management, prototyping and manufacturing programs, outsourcing opportunities, facilitating e-commerce, e-marketing and Customer relationship management system.

The Community Development Portals

Country: Egypt
Website: <http://www.aradina.net>

Description:
The project aims to build a rich network of Arabic virtual communities covering specialized fields in community development, including agriculture, entrepreneurship, public health, capacity building, and career development. A socially and economically sound model was conceived to favour building the virtual communities and establishing the information society. Aradina.net is a virtual community in which all participants are involved building it and developing its content and guiding its provided services, and making many sort of benefits out of it.

VAVAN ICT Agricultural Sustainable Project

Country: Cameroon
Website: No website

Description:
This project fosters agricultural development, by easing communication between farmers and the community. Using SMS farmers can supply their produce directly to consumers without having to go to distant markets. This has reduced transportation costs, accidents and even theft as police can be called at short notice.

TradeNet

Country: Ghana
Website: <http://www.tradenet.biz>

Description:
This mobile2mobile trading platform provides market information and SMS communication tools to producers and traders and their representative associations across the continent.

VOS Project

Country: Italy
Website: <http://www.orcosoana.tv>

Description:
This public-driven project aims at transforming an isolated mountainous area into a "digital territory", promoting sustainability and digital convergence and bridging the digital divide. A trial area has been selected in order to maximize the model's transferability into other regional areas.

WIZZIT Mobile Banking

Country: South Africa
Website: <http://www.wizzit.co.za>

Description:
WIZZIT uses cell phones to provide accessible and affordable transactional banking to the millions of financially excluded people.

Y Don't U

Country: United Kingdom
Website: <http://www.ydontu.tv>

Description:
Y Don't U is a project based on teaching new and broadcast media skills, aimed at Glasgow-based 16 - 17 year olds at key transitions in life, to prepare them for employment.

Education

AGE Global Paperless Homework

Country: Malaysia
Website: <http://www.paperlesshomework.com>

Description:
AGE empowers teachers around the world to create paperless classrooms and homework for a greener world and more effective use of ICT in Global mass education.

ASSET-ICT

Country: India
Website: <http://www.assetindiafoundation.org>

Description:
The project will teach Computer literacy to victims of trafficking, rape, incest and children of women in prostitution in order to provide more healthy livelihoods and help with HIV/AIDS prevention.

Aston Pride Computers in the Home

Country: United Kingdom
Website: <http://www.astonpride.com>

Description:
Aston Pride is a Multi Stakeholder Partnership that addresses the digital divide in one of the most deprived areas of Birmingham by utilising the ICT capabilities of the young people of the community.

Bangladesh Global Connections and Exchange Project

Country: Bangladesh
Website: <http://www.connect-bangladesh.org>

Description:
The project is about more than hardware and teaching ICT skills -- it endeavours to transform the approach to teaching and learning at host schools using ICT, to develop training and learning projects for teachers, students and community members and to increase global dialogue and educational opportunities by installing Internet enabled telecentres in rural areas in Bangladesh.

Computer Mania Day

Country: United States
Website: <http://www.computer-mania.info/>

Description:
Computer Mania Day provides a half day of technology-related activities for up to 800 middle school girls and their parents and teachers to provide a broad-based introduction to the ways in which different careers make use of ICTs, the opportunities in the field, and the rigorous educational pathways needed that lead to cutting edge ICT careers.

Computers For Families Blueprint

Country: United States
Website: <http://www.sbcff.org>

Description:
The strategic mission is to ensure that young students are provided with opportunities to learn technology both in public schools and at home to bridge the digital divide. Santa Barbara Partners in Education supports this mission by providing all students from low-income families with donated refurbished computers, discounted Internet access, training and instruction.

E-ngageLive

Country: United Kingdom
Website: <http://www.e-ngagelive.net>

Description:
This project enables pupils in school to engage live online with professionals in the community to explore issues of importance to their personal and social education and development.

Engaging ICT in Development

Country: Zambia
Website: <http://www.project-educate.org>

Description:
To introduce and integrate the use of ICT into schools and communities as a way of empowering individuals and communities and helping to build developmental capacity.

Container Project

Country: Jamaica
Website: <http://www.container-project.net>

Description:
The Container Project is a Not For Profit Community Multimedia Centre providing basic computer training including digital music and video production computer repair and maintenance literacy and numeric competence and accreditation for those who wish for further education and the development of their creative talents.

DATCO - Kenya

Country: Kenya
Website: No website

Description:
This social enterprise provides data back up services to institutions, produces computer designed wall hangings, offers a range of training programs to clients who range from organisations, the community and social groups. DATCO collects, analyses, records and stores the data manually and electronically and in two years has trained over 600 rural people in agriculture, economic development and health and basic computer skills.

Escuela Virtual

Country: Colombia
Website:
<http://evirtual.recintodelpensamiento.com/escuelavirtual/>

Description:
"Virtual School" democratizes knowledge, information and communication by giving rural schools and communities new tools and capacities that allow them to solve their problems, have new life alternatives and establish collaboration bonds. It aims to improve education quality in rural schools and reduce the rural-urban-development gap in Colombia.

Film Street

Country: United Kingdom
Website: <http://www.filmstreet.co.uk>

Description:
Film Street website introduces children under 12 years to a wider range of film, teaches them how to understand and appreciate film and inspires them to make their own films. Aspiring film-makers find fun-packed interactive activities, movie-making ideas and expert advice wrapped up in a friendly and easy to use interface.

Fire and Ice - Learning Across Borders

Country: Canada
Website: <http://www.illuminate.com/community/fireandice.jsp>

Description:
Fire and Ice develops the "leaders of tomorrow" by connecting schools in North America and Europe with schools in rural and remote areas of developing nations. Students engage in live, online collaborative projects that address critical social challenges such as climate change and poverty reduction to ensure that no student is left behind due to geography or financial resources.

GIRI PRAGNA

Country: India
Website: <http://www.giripragna.org>

Description:
Ten thousand underprivileged tribal students of 6th to 10th standard every year receive Computer aided formal education and Computer Education in local languages in most remote and forest areas of Khammam district.

ICT Training for People With Disabilities

Country: Syrian Arab Republic
Website: <http://www.caihand.com>

Description:
ICTs offer the ability to compensate for special needs to access knowledge by adapting digital media to the nature of their disabilities, and to enhance their social and economic integration in communities, build capacity and combat poverty.

Information Dissemination and Equal Access

Country: Russian Federation
Website: <http://www.idea-russia.ru>

Description:
IDEA brings Internet technology and free Microsoft training courses to underserved communities and populations throughout Russia in the form of community-based IDEA Computer centres, each of which is a partnership involving a local organization and stakeholders that draws on Project Harmony's expertise and oversight.

iCentres Project

Country: Bulgaria
Website: <http://www.icentres.eu>

Description:
Through a network of over 100 telecentres with access to ICTs, broadband connectivity and various services to citizens and SMEs in local communities in Bulgaria, the iCentres Project is the leading national provider of ICT-based services for lifelong learning through digitally-enhanced training programs and facilities

ICT for Illiteracy Eradication

Country: Egypt
Website: <http://ie.ictfund.org.eg/>

Description:
ICT4IE converts literacy classes into a simple, interactive computer-based tutorial that teaches basic reading and writing skills to illiterates. Learning is embedded into the context of every day life and are dramatized using sound and music effects. The e-content emphasises progressive topics such as health, education, political rights, environment, and family care to enhance retention and understanding and maintain motivation and interest.

iNTELLiBOOK.net

Country: Italy
Website: <http://www.intellibook.net>

Description:
iNTELLiBOOK.net is the Internet Kiosk of Reading, in which users can browse documents by content before deciding whether or not to Buy.

KHouse Project in Brazil

Country: Brazil
Website: <http://www.khouse.fplf.org.br>

Description:
KHouse Project develops Educational, computer-based activities to bridge the digital and social divide among children, youth, and adults, including teachers and seniors.

Knowing Me Is Knowing You

Country: Romania
Website:
<http://www.geocities.com/optionalcourse7a191>

Description:
